Re: Notice of Intention to Commence Small Mining Operations, ML 46643, S/025/020, Kane County, Utah

Dear Mr. Berry:

We are in receipt of a copy of your notice of intention to operate under ML 46643 which you submitted to the School and Institutional Trust Lands Administration (SITLA).

The notice does not contain all the information required under the Utah Mined Land Reclamation Rules R647-3. We have enclosed a Small Mining Operation Notice of Intention form (MR-SMO) which we request that you complete and return to our office at your earliest convenience. Also, we have enclosed an enlarged copy of the map which you submitted with your ML 46643 notice. Would you please clearly indicate where your operation will be located on the larger scale map. Please "highlight" or pencil in the principal roads that will be used (or created) to access the mine site area. SITLA has informed us that your operation is not located on state managed lands, but rather on private. State Mining Law requires that a SMO be filed with this office, regardless of the land ownership.

Thank you for your attention to this matter. We will temporarily suspend our review and await the submission of the completed MR-SMO form. Please refer to our referenced file number S/025/020 when submitting the notice. If you have any questions, please contact me at your convenience.

Sincerely,

D. Wayne Hedberg
Permit Supervisor
Minerals Regulatory Program
